**DETAILED ACTION*****Allowable Subject Matter***

Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a process for producing a diesel fuel fraction from bitumen comprising stimulating the production of bitumen with steam obtained from a natural gas fed gas conversion process that produces a diesel hydrocarbon fraction and steam, upgrading said bitumen to lower boiling hydrocarbons including a diesel fraction, and forming a mixture of both said diesel fractions. The prior art of record also does not disclose a process for producing a diesel fraction from bitumen comprising converting natural gas to a hot synthesis gas comprising a mixture of H<sub>2</sub> and CO which is cooled by indirect heat exchange with water to produce steam; contacting said synthesis gas with a hydrocarbon synthesis catalyst in one or more hydrocarbon synthesis reactors, at reaction conditions effective for said H<sub>2</sub> and CO in said gas to react and produce heat, liquid hydrocarbons including a diesel fuel fraction, and a gas comprising methane and water vapor; removing heat from said one or more reactors by indirect heat exchange with water to produce steam; and hydroisomerizing at least a portion of said diesel fraction to reduce its pour point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
